WORK HISTORY

Software Engineer

04/2025 - Present

Muno AI Pvt. Ltd.

- Led the design and development of MindTraQk, a scalable AI- Copilot workforce intelligence platform, integrating Slack, Jira, GitHub, and Google Meet to deliver real-time productivity, burnout, and task redistribution insights.
- Architected a full-stack microservices system using Node.js, Express.js, MongoDB, Redis, and RESTful APIs, with authentication and role-based access powered by JWT, Zod, and TypeScript.
- Built and deployed a modern frontend using React + Vite, Zustand, TanStack Query, and Tailwind CSS, with dynamic role-based dashboards, SSO, and seamless AI interactions through OpenAI integration.
- Implemented secure, containerized deployments using Docker, AWS EC2, Nginx Load Balancer, and CI/CD pipelines, ensuring scalable and fault-tolerant service delivery across environments.
- Directed the end-to-end product lifecycle from system design to cloud deployment, collaborating cross-functionally to ensure seamless OAuth integrations, OAuth verification readiness, and multi-tenant architecture.
